

Marvellous Mini-beasts Hunt

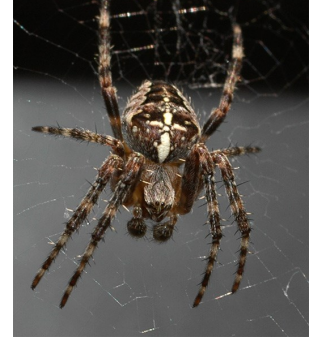

Let's go on a nature hunt! Try and find all of these marvellous mini-beasts within our garden today!

Bees visiting lots of flowers - see how many kinds you can find! We also have a bee hive to look out for...

Slugs - they like it best when it's wet, with lots of dead plants to eat!

Spiders - look out for their webs!

Butterflies, with lots of patterns on their wings!

Snails - try and find some with different patterns on their shells!

Hoverflies - they look very similar to wasps to stop them getting eaten!

Ladybirds - See how many spots you can count on each one - are they all the same?

Earthworms - look out for them after a rainstorm!

Beetles - there are more than 4,000 different kinds in Britain alone! How many can you find today?

Grasshoppers - especially in long grass. Listen out for them!

Ants - you can see them foraging best on hot days!
